## Cystorelief

### CYSTITIS

Uva-ursi & Echinacea oral drops

## i Information

### Important things you need to know

- This product is used to help relieve minor urinary complaints associated with cystitis in women.
- This product is suitable for women over 18 years.
- **Don't take** this product if you are allergic to any of the ingredients: see section 6.
- **Before you take this product:** read section 2.
- **Dosage instructions:** see section 3.
- **Talk to your doctor** if your symptoms worsen, or do not improve after 7 days.
- Side effects can occur when taking this product: see section 4.

**Now read the rest of this leaflet carefully.** Keep this leaflet. You may need to read it again.

### 1. What this product is and what it is used for

Cystorelief Cystitis Uva-ursi & Echinacea oral drops is a traditional herbal medicinal product used to help relieve minor urinary complaints associated with cystitis in women such as:

- Frequent urination
- Burning sensation when urinating

This is based on traditional use only.

### 2. Before you take this product

#### Do not take this product

- If you are under 18 years of age.
- If you are **allergic** to
  - Echinacea or plants of the daisy (Asteraceae/Compositae) family. Echinacea is a member of the daisy family.
  - Uva-ursi, also known as *Arctostaphylos uva-ursi*.
  - Any of the ingredients of this product (listed in section 6).
- If you have a tendency to allergies, such as hives, allergic eczema or asthma.

- If you **suffer** from
  - TB (the infection tuberculosis)
  - Sarcoidosis (a connective tissue disorder which causes the formation of clumps of cells mainly in the lymph nodes, lungs and liver)
  - An autoimmune disease such as collagenoses (inflammation of the connective tissue) or multiple sclerosis
  - HIV, AIDS or any other condition which decreases your resistance to infection
  - A disorder which affects your white blood cells such as agranulocytosis (low white blood cell count due to bone marrow disorders) or leukemia (blood cell cancer)
  - Impaired kidney function
  - A kidney disorder or if you have suffered from a kidney disorder in the past
  - Fluid retention caused by a heart or kidney problem
  - A condition which requires you to restrict your fluid intake e.g. severe heart or kidney disease
- If you are **taking**
  - Ciclosporin, methotrexate, or any other immunosuppressant medicine.

- Any medicine which is affected by alcohol.
- If you are having treatment to reduce the response of your immune system (immunosuppression) e.g. chemotherapy, radiotherapy.
- If you have had an organ or bone marrow transplant.
- If you are pregnant or breast-feeding.

### See your doctor before taking this product

- If you are prone to developing allergic reactions. Echinacea can trigger severe and life-threatening allergic reactions in patients who have a tendency to allergic reactions.

### You should also know

- This medicinal product contains 213 mg of alcohol (ethanol) in each 15 drop dose.
- The amount in 15 drops of this medicine is equivalent to less than 6 ml beer (just over a teaspoon) or 3 ml wine (just over half a teaspoon).
- The small amount of alcohol in this medicine will not have any noticeable effects.

## Using

### 3. How to take this product

**Adult women over 18 years:** Take 15 drops in a little water two to five times daily.

Make sure you drink plenty of fluids whilst taking this product.

Not for use in children or those under 18.

For oral use only. Do not take more than the recommended dose.

### If you feel this product isn't working

- See your doctor
  - If you have a high temperature (fever)
  - If you have difficulty passing urine or have spasms
  - If it is painful to pass urine
  - If you become incontinent
  - If you have blood in your urine
- If your symptoms worsen, or do not improve after 7 days, you should see your doctor to check your symptoms are not being caused by any underlying medical condition.

Please turn over...

## Using

### If you take too much

- If you take too much and feel ill, talk to your doctor. Taking too much is unlikely to be harmful.
- Overdose of this product may result in alcohol intoxication and should be treated accordingly (see section 2 'You should also know' for alcohol content).

### If you forget to take this product

- Do not worry about a missed dose. Take the next dose as usual.

### Driving and using machines

- This product contains alcohol (see section 2 'You should also know' for alcohol content).

0845 608 5858.

## Side effects

### 4. Possible side effects

Like all medicines, this product can cause side effects, although not everybody gets them.

#### Side effects

If any of the following serious allergic reactions occur, you should stop taking this medicine and seek medical advice immediately:

- Anaphylactic reaction. This is a severe and potentially life-threatening reaction with symptoms that may include feeling lightheaded or faint, breathing difficulties or wheezing, a fast heartbeat, skin rash, confusion, anxiety or loss of consciousness
- Swelling or blistering of the skin, such as the face, lips, tongue, mouth or throat
- Difficulty breathing including shortness of breath
- Asthma or worsening of asthma symptoms

#### Allergic reactions

Allergic skin reactions may occur such as:

- Skin rash
- Red, itchy spots (urticaria)
- Itching

If these occur seek medical advice as soon as possible.

Echinacea can trigger allergic reactions in patients who have a tendency to allergic reactions.

Stop taking this product and seek medical advice immediately if you experience any allergic reaction.

There have been isolated reports suggesting an association between Echinacea products and autoimmune diseases such as:

- Inflammation of the brain and spinal cord (disseminated encephalitis)
- Painful lumps on the shins (erythema nodosum)
- Low blood platelet count (immunothrombocytopenia)
- Destruction of blood cells by antibodies (Evans Syndrome)
- Dryness in the mouth and eyes with renal tubular dysfunction (Sjögren Syndrome)

A decrease in the number of white blood cells (leucopenia) may occur in long-term use (more than 8 weeks).

The frequency is not known. This means it is not known how often these reactions occur as there have not been enough reports to allow this information to be calculated.

### Digestive symptoms

- Nausea
- Feeling sick or vomiting
- Stomach ache

These are often short-lived and should go away by themselves. However if they are troubling you, talk to your doctor or pharmacist.

This product may make your urine appear greenish-brown in colour. This is a harmless effect.

If you are concerned about any side effect or if you notice any side effects not listed in this leaflet, please tell your doctor or pharmacist.

### Reporting of side effects

- If you get any side effects talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet.
- You can also report side effects directly via the Yellow Card Scheme at [www.mhra.gov.uk/yellowcard](http://www.mhra.gov.uk/yellowcard) or search for MHRA Yellow Card in the Google Play or Apple App Store.
- By reporting side effects you can help provide more information on the safety of this medicine.

## Information

### 5. How to store this product

- Keep out of the sight and reach of children.
- Do not use this product after the expiry date which is stated on the packaging. The expiry date refers to the last day of that month.
- This product does not require any special storage conditions.
- Use within 4 months of opening.
- Do not use this product if you notice a change in appearance. It should be a clear to opalescent liquid that is brown-yellow to brown in colour.

### 6. Further Information
